

NCW Series Reversible Temperature Indicator Label

Product Overview

The reversible temperature indicator label can show temperature change with color, number. It is reversible and has adhesive sticker itself. This label is widely used for temperature monitoring of various indoor object surfaces, such as monitoring the temperature of electrical equipment casings, manufacturing industries, etc.

Once the temperature of the monitoring area reaches or exceeds the rated temperature of the temperature measuring patch, the color changing temperature measuring patch immediately changes from black to red and displays the overheating number at that location on the temperature measuring patch. When the monitoring temperature turns to cool under the rated temperature, label will recover the original color.

It is easy for people to detect the temperature rise in the monitoring area during inspection, thereby identifying potential faults and preventing accidents from occurring.

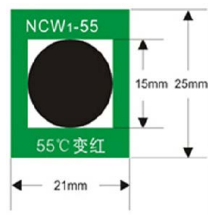

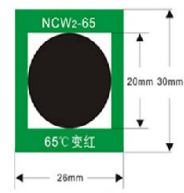

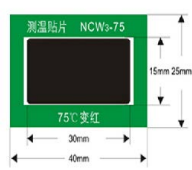

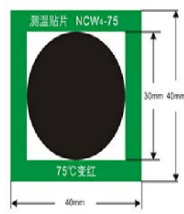

Feature

- A. Reversibility makes it can be used time and again.
- B. Color change and temperature number indication.
- C. Temperature accuracy is $\pm 2^{\circ}\text{C}$.
- D. Protective film is water-proof, dust-proof, oil-proof and antifouling.

Temperature Range	55/65/75°C, accept custom temperature threshold
Tolerance	$\pm 2^{\circ}\text{C}$
Color Change	Black to red if overheat, revert to black color if temperature below the threshold
Material	Backing cardboard, PE top layer film, adhesive, temperature change wax
Shelf Life	2 years

Specifications

Model	Size	Packing	Color Changing	Picture Refer
NCW1-55	25 x 21 mm	25pcs/sheet, 2000pcs/box(25pcs*80sheets)	Black to red if overheat, revert to black color if temperature below the threshold (or custom color)	
NCW1-65				
NCW1-75				
NCW2-55	30 x 26 mm	16pcs/sheet, 1280pcs/box(16pcs*80sheets)		
NCW2-65				
NCW2-75				
NCW3-55	25 x 40 mm	10pcs/sheet, 800pcs/box(10pcs*80sheets)		
NCW3-65				
NCW3-75				
NCW4-55	40 x 40 mm	9pcs/sheet, 720pcs/box(9pcs*80sheets)		
NCW4-65				
NCW4-75
