

80° Single Angle Tilt Indicator Label

Product Overview

Tilt Indicator Plus is a multi-function logistic monitor device that has three separate indicator sections for detecting left tilt, right tilt and overturn, and indicates the degree of the tilting.

The indicators provide a prominent visual deterrent and 360 monitoring of improper handling on goods which must remain upright, reduce mishandling during transportation or storage.

The product accessories include a main product tilt indicator Plus, and a companion warning label.

Use Tips

Step1: Tear off the backing adhesive, the tilt indicator activated

Step2: Stick on the package carton, better stick two labels on adjacent sides of package to make a comprehensive monitoring

Step3: When the goods arrive at the destination, the balls position will show whether tilting during the transport and how's the tilting angle.
